MPsrch_pp protein - protein database search, using Smith-Waterman algorithm

Run on: Mon Nov 2 16:31:05 1998; MasPar time 19.22 Seconds 691.579 Million cell updates/sec

Tabular output not generated.

Title:

Description: erfect Score: equence: >US-08-906-365-2 (1-530) from US08906365.pep 3904 1 MDIKNSPSSLNSPSSYNCSQ......ECSPAEDSKSKEGSQNPQSQ 530

Scoring table: PAM 150 Gap 11

Searched: 69111 seqs, 25083644 residues

Post-processing: Minimum Match 0% Listing first 45 summaries

Database: swiss-prot35 1:swiss1

Statistics: Mean 50.804; Variance 83.063; scale 0.612

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 295
                                                                                                                                                                                                                                                                                                                                                                                              DOMAIN: COMPOSED OF THREE DOMAINS: A MODULATING N-TERMINAL DOMAIN, A DNA-BINDING DOMAIN AND A C-TERMINAL STEROID-BINDING DOMAIN. A DNA-BINDING DOMAIN, STEROID HORMONE RECEPTORS ARE THOUGHT TO BE WEAKLY ASSOCIATED WITH NUCLEAR COMPONENTS; HORMONE BINDING GREATLY INCREASES RECEPTOR AFFINITY. THE HORMONE-RECEPTOR COMPLEX APPEARS TO RECOGNIZE DISCRETE DNA SEQUENCES UPSTREAM OF TRANSCRIPTIONAL START SITES.

BIOCHEM. BIOPHYS. RES. COMMUN. 205:1093-1101(1994).

-i- FUNCTION: THE STEROID HORMONES AND THEIR RECEPTORS ARE INVOLVED IN
THE REGULATION OF EUGARYOTIC GENE EXPRESSION AND AFFECT CELLULAR
PROLIFERATION AND DIFFERENTIATION IN TARGET TISSUES.

-i- SUBCELLULAR LOCATION: NUCLEAR.

-i- DOMAIN: COMPOSED OF THREE DOMAINS: A MODULATING N-TERMINAL DOMAIN.
A DNA-BINDING DOMAIN AND A C-TERMINAL STEROID-BINDING DOMAIN.
-i- SIMILARITY: TO OTHER MEMBERS OF THE STEROID/THYROID/RETINOIC
                                                                                                                                                                                         MEDLINE;

MPsrch_nn n.a. - n.a. database search, using Smith-Waterman algorithm

Run on: Tue Nov 3 04:56:49 1998; MasPar time 74.31 Seconds 1058.292 Million cell updates/sec

Tabular output not generated.

Title:

>US-08-906-365-1 (1-1686) from US08906365.seq 1686

Description:
Perfect Score:
N.A. Sequence:
Comp: 1 cagccattatacttgcccac......agaacccacagtctcagtga 1686 gtcggtaatatgaacgggtg......tcttgggtgtcagagtcact

Scoring table: TABLE default Gap 6

Nmatch STD: Dbase 0; Query 0

Searched: 88822 seqs, 23323279 bases x

Post-processing: Minimum Match 0% Listing first 45 summaries

Database:

n-issued 1:5_COMB 2:PCT9_COMB 3:backfiles1

Statistics: Mean 9.055; Variance 4.480; scale 2.021

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
